

## Project manager (m/f)

Blackstone Resources AG in Geroldswil/Switzerland

The demand for high-performance battery cells will increase sharply in the next few years. Battery cell development is about to make a number of revolutionary breakthroughs. Blackstone is a pioneer in the field of electrode and battery cell printing. We are rapidly expanding as a business and are looking for talent individuals to help us succeed in developing the series production of solid-state electrolytes in the next generation of battery technology.

Join us and become a pioneer!

We are looking for an experienced **Project Manager** who is keen to be part of a company that is exposed to one of the biggest megatrends of this century – The battery revolution.

### Your profile

- You will setup and manage a number of projects. This will involve
  - Upscaling the synthesis of solid electrolytes (Empa)
  - Simulating the battery production process (BFH)
- You also coordinate and manage our development partners in Switzerland
- You maintain a close cooperation with German-based Blackstone Technology GmbH and its development partners in Germany
- Commercial planning will be required, plus taking charge of reporting and billing for the projects

### You should apply if you

- Think disruptively and are very self-motivated
- Have extensive experience in scientific research on cell chemistry and battery cells
- Maintained a comprehensive network within the industry and have an excellent reputation
- Have at least one completed university degree
- Ideally have experience in the battery industry
- Appreciate the intrinsic strength and dynamism of a start-up company
- Are able to demonstrate natural leadership qualities with empathy

### What you will get from us

- A high degree of personal responsibility for quick decision-making
- An attractive bonus programme
- Advanced training
- Partial home office

If this position interests you, please apply with your complete dossier to: [h.gritzka@blackstoneresources.ch](mailto:h.gritzka@blackstoneresources.ch).

### About the company

Blackstone Resources is a Swiss holding company based in Baar, Canton Zug, and focuses on battery technology and the battery metal market. The 100% subsidiary Blackstone Technology GmbH is building a production facility for printed batteries in the Döbeln / Germany plant. In summer 2021, our first products will be produced here on series production lines. The advantages of our patented technology are truly diverse and lead to a high level of competitiveness.
